

Deposit D1

Make your store a safer place to work

GUNNEBO[®]
For a safer world

Simplified Cash Process: Smart, Safe, Efficient

Deposit D1 is a secure and intelligent front-line cash-handling solution. Notes are deposited at the point-of-sale, ensuring note validation and instant note value data.

With Deposit D1, your business enjoys the power of real-time visibility of the cash flow. And when combined with Gunnebo's web-based monitoring software, CashControl, Deposit D1 can rapidly accelerate your return on investment.

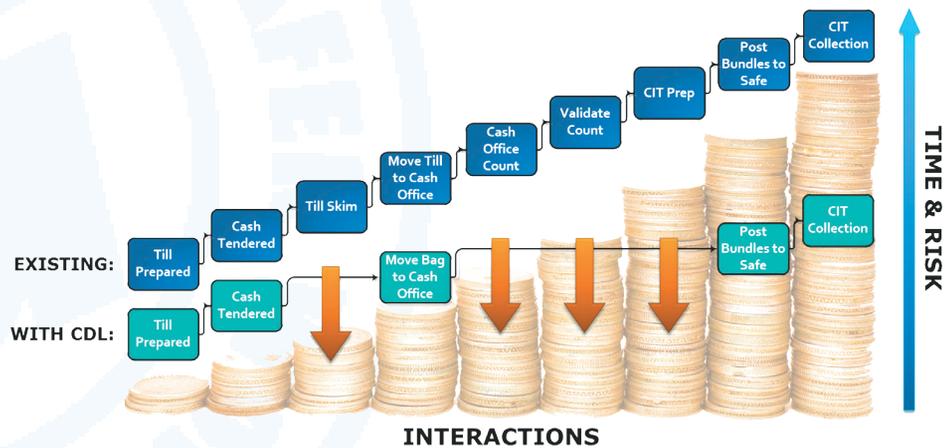

Using the optional tamper-resistant SmartBag means the deposited money is untouched until it reaches your cash processors. This ensures 100% of it reaches your bank account allowing you to completely eliminate theft and shrinkage from your daily worries.

Deposit D1 means security, peace of mind, operational excellence, and opportunities for increased efficiencies.

Deposit D1 is a cost-effective, simple and convenient solution that reduces the risk of robbery, requires less investment, and ensures the exact amount of cash in each till, at each store location.

The under-counter Deposit D1 is perfectly designed for you and your business.

Specific cash-handling challenges:

The intelligent and secure cash-handling solution

Using the optional SmartBag with your Deposit D1 means your cash does not need to be touched from the time it enters a till until it arrives at your Bank or Cash Center. No more manual counting or verification. Notes are validated immediately after insertion.

The self-sealing, tamper-evident, barcode-labeled Deposit D1 SmartBag provides a simplified cash cycle and streamlines processes.

During cash collection, only the bag is removed. The cassette is then ready for a new SmartBag to be installed. With a capacity of up to 1,000 notes, the SmartBag adapts to the amount of notes inserted. It is a lighter and less bulky solution, which results in less space required in cash-in-transit (CIT) vehicles, allowing for greater operational efficiencies.

The temptation and opportunity for a robbery is reduced. The cash is secured right up to the point of processing, ensuring your staff feels safer.

Track cash flow in real-time with CashControl

Deposit D1 gives you the ability to continuously track cash levels, providing a real-time inventory using Gunnebo's web-based CashControl monitoring software.

CashControl can be hosted by Gunnebo or by you and the program can be run either locally or centrally.

Advanced security against counterfeit notes

The full scan 'light bar' source provides six wavelengths of light and scans more of the note surface.

Deposit D1's advanced recognition algorithms facilitate higher acceptance rates for legal notes, while increasing security against counterfeit notes.

Optimize maintenance and pick-up times

Gunnebo Service can be connected to monitor machinery technology so that maintenance and updates can be carried out proactively, before a problem occurs. Gunnebo Service is open all hours, with a guaranteed response time that is set according to your business requirements.

The data can be optimized in other ways, including granting your CIT partners access to the system to help optimize route planning and pick-up times.

Deposit D1 is fully configurable and is supplied Ethernet-ready. Other connectivity options are also readily available.

BENEFITS

1. Enhanced security and peace of mind thanks to the efficient cash management system
2. Faster return on investment
3. Time and cost savings as a result of a simplified cash-handling process, as well as reduced maintenance and down time
4. Less back-office administration due to easy-to-use configuration and simple installation
5. Complete transaction transparency for zero cash discrepancies
6. Real-time, web-based monitoring of cash levels via CashControl software
7. Ability to approve CIT companies for cash collections
8. Unrivalled protection against fraudulent notes
9. Increased efficiency and higher acceptance rates due to advanced recognition algorithms that confirm notes as genuine at point-of-sale
10. Simple, safe and efficient

TECHNICAL DATA

Steel housing	0.1 in. casing
Operating system	Windows 7 embedded
Feeder capacity	Single note deposit
Mei SC Advance reader transaction speed	2.3 notes/second to stack
Cash Box capacity	1200 standard cassette - 1000 notes cassette bag (optional) 600 standard cassette (no bag option)
Communication	TCP/IP - 3G and Bluetooth (optional)
Dimensions	Deposit D1 1200 Dimensions: 13.8 x 5.1 x 16.5 in. (HxWxD to the end of the bezel) No electronic lock option Deposit D1 600 Dimensions: 13.8 x 5.1 x 12.1 in. (HxWxD to the end of the bezel)
Weight	30.4 lbs.
Voltage	120V AC
Current	8.2A

The Gunnebo Security Group is a global leader in security products, services and solutions with an offering covering cash handling, safes and vaults, entrance security and electronic security for banks, retail, CIT, mass transit, public and commercial buildings, and industrial and high-risk sites.
